

# NERM 2006

Binghamton, New York  
October 5 – 7, 2006

Northeast Regional Meeting of the American Chemical Society

## SYMPOSIUM

# Laser Spectroscopy for Life Sciences

### Session Topics

- ✦ Raman and IR spectroscopy for characterizing structure and dynamics of biological systems
- ✦ Laser microscopy and near-field spectroscopy
- ✦ Time-resolved fluorescence, FRET and single molecule spectroscopy
- ✦ Bioapplications of SERS
- ✦ Open topics of discussion

### Format

Invited talks and unsolicited oral and poster presentations.

The Northeast Regional Meeting (NERM) will bring together the American Chemical Society, the Materials Research Society, the Watson School of Engineering and Applied Science, the IEECPMT Society and many other organizations to create an exciting program highlighting emerging technologies and the chemical sciences.

**SPONSORS are WELCOME**
